VERSION**
4.1

Dynamic Image Enhancement
and Color Correction

Dynamic Image Enhancement and Color Correction

Extensis IntelliHance Pro 4 quickly and dynamically enhances images to make them look their best. Compare and print up to 25 professional enhancement variations at once. Perfect for enhancing images from any source, including digital cameras.

New Features

Support for Mac OS X and Photoshop 7

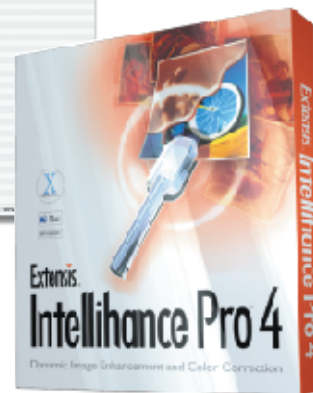

Make any image look its best! IntelliHance Pro 4 brings its award-winning image enhancement technology to Mac OS X and Photoshop 7.

Visually Adjust Your Images

Takes Photoshop Variations to the next level. Visually and interactively adjust any setting, including color, contrast, and sharpening. Quickly change the incremental variance for adjustable fine-tuning.

Enhanced

IntelliHance Pro 4.1 System Requirements

Macintosh:

Photoshop 6.0.1 or higher
Mac OS 9.2.2 or Mac OS X v. 10.2.5 or higher
PowerPC G3 or higher
128 MB of system RAM

Windows Requirements:

Photoshop 6.0.1 or higher
Microsoft Windows 98/2000/XP
Pentium III or higher
128 MB of system RAM

Additional Features

Professional Image Enhancement

IntelliHance Pro analyzes each image individually to determine the optimal settings for enhancing or color correcting. Easily fine tune and compare different settings for fast professional results.

Streamlines Image Adjustment

IntelliHance Pro consolidates dozens of imaging options into a single dialog, including contrast, brightness, saturation, sharpness, dust & scratch reduction, paper & ink settings, cast removal and more.

Save Presets

Save enhancement settings for future use within IntelliHance Pro. Presets are available directly from Photoshop menus for rapid image correction. Provides several presets for common adjustments and digital camera options.

Batch Processing

Using Photoshop Actions, you can process an entire folder of images hands-free. Each image is analyzed and enhanced based on the individual needs of the image. Ideal for large jobs.
