

Extensis Mask Pro 3

Unmatched Masking Power & Precision

More Control and Precision for Unmatched Masking Results

Extensis Mask Pro 3 combines a powerful, intuitive toolset with advanced color matching and decontamination technology to deliver superior, real-world masking results down to the finest detail.

New Features

NEW! Color Decontamination for Improved Edge Transparency

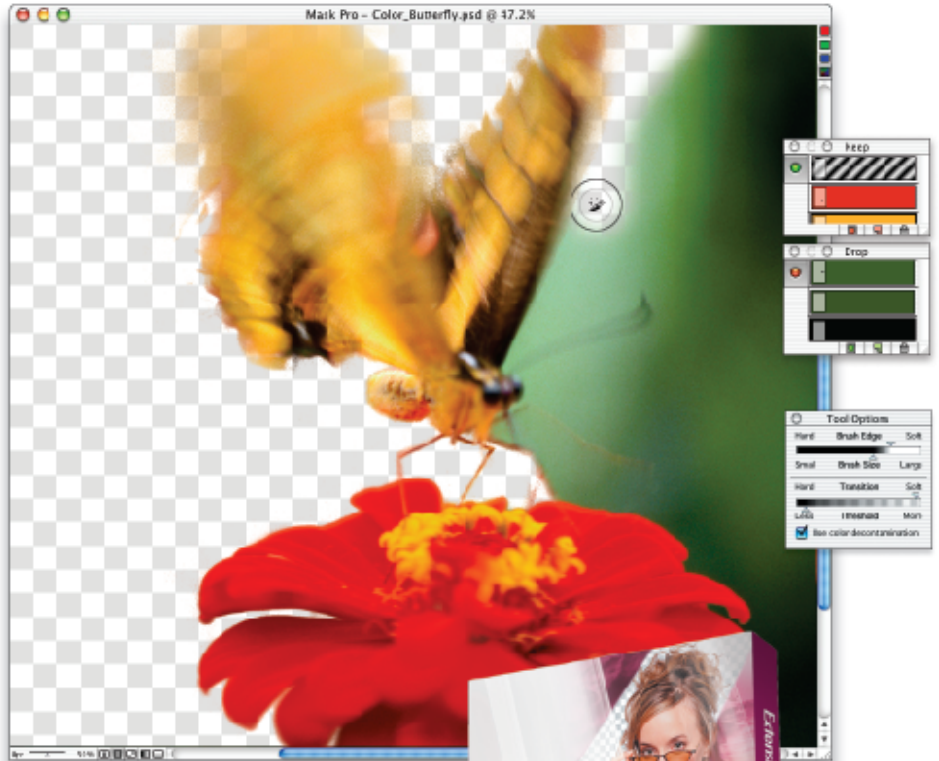

One of the most powerful new features in Mask Pro 3, Color Decontamination greatly improves the masking of semi-transparent edges like hair or glass.

NEW! Keep/Drop Highlighting

These new Highlighters let you define specific areas you want to keep and drop, making the masking process easier and quicker than ever before.

NEW! Touchup Tools and Controls

With the additions of the new Blur and new Chisel tools and other enhancements, Mask Pro provides the most advanced and intuitive toolset available. No other masking solution provides as many tools for creating the perfect mask.

Additional Features

Accurate clipping paths

Vector-based clipping paths ensure superior print quality and eliminate jaggies. Easily control path choke and tightness to fine-tune results. Mask Pro generates smooth clipping paths blindingly fast that quickly rip on any imagesetter.

Intelligent Edge Detection

Mask Pro's Magic Pen automatically detects and creates detailed edges between contrasting areas of an image, perfect for tracing tricky edges. Resulting paths can either be edited as traditional Bezier or edge-detecting paths.

True Plug-In Technology

Unlike other masking solutions, Mask Pro is a true Photoshop plug-in, operating within Photoshop's existing memory allotment. Thus it requires no additional memory and does not impact other system resources.

Real-Time Previews

Mask Pro lets you preview the results of your work in real-time, saving you time and ensuring you get the results you want.

Macintosh:

Photoshop 6.0.1 or higher
Mac OS 9.2.2 or Mac OS X v. 10.2.5 or higher
PowerPC G3 or higher
128 MB of system RAM

Windows Requirements:

Photoshop 6.0.1 or higher
